

Colm Rogers

Technical Content Leader · Information Developer · Docs-as-Code & AI-First Authoring

Vienna, Austria · +43 660 959 1035 · colmrogers91@gmail.com · linkedin.com/in/colmrogers · rogers-1991.github.io/Portfolio_Website

PROFESSIONAL SUMMARY

Technical content leader and information developer focused on developer-facing documentation for B2B software. I own multi-repository, version-controlled documentation architecture on a docs-as-code workflow (Markdown, AsciiDoc, Git, Antora, Docusaurus, Jira, Confluence) and act as the final accuracy and quality gate across a multi-stage authoring pipeline, structuring content to serve both human readers and AI consumers. An early adopter of AI-first, agentic authoring, I design prompts, instruct Claude-based agents, and curate AI-generated output. Currently Head of Technical Services at Anyline, leading the technical content, support, and data-operations functions of the department.

CORE SKILLS

Documentation & Content: Technical Writing, Information Development, Documentation Strategy, Information Architecture, Content Modeling, Taxonomy, Structured & Modular Content, Knowledge Base Management, SDK/API Documentation, Editorial Review & Curation

Docs-as-Code & Tooling: Markdown, AsciiDoc, MDX, Git/GitHub/GitLab, Antora, Docusaurus, Jira, Confluence, Salesforce, VS Code, Command Line, CI/CD, Agile

AI-First & Agentic: AI-First Authoring, Prompt Design, Agentic Tooling (Claude), AI Content Curation & Review, Reusable Templates & Skills, Agent-Instruction Files

Web & Media: HTML, CSS, JavaScript, React, Tailwind CSS, Instructional Video Production, Visual Asset Design

PROFESSIONAL EXPERIENCE

Head of Technical Services

May 2025 – Present

Anyline GmbH — Vienna, Austria · Acting May 2025 – Jan 2026; confirmed in role Jan 2026

- Lead the Technical Services department across three pillars — Technical Content, Technical Support (3 engineers), and Data Operations — owning end-to-end documentation strategy for a B2B computer-vision SDK platform and managing two team leads.
- Spearheaded a self-initiated, C-level-backed AI R&D programme that proved synthetically generated training data (built in Blender) is viable for Anyline's Tire Tread SDK — engineering a hierarchical "Russian Doll" system of scoped Claude agents, each with its own rules, responsibilities, and directory scope, and now leading development of an in-house generator to automate the pipeline; hands-on prompt design, agent instruction, and curation of AI output throughout.
- Serve as the final accuracy and experience quality gate for the Antora-based docs-as-code architecture: through structured Jira workflows, review, structure, and refine technical content from Engineering and Product SMEs to ensure retrievability, accuracy, and adherence to authoring standards.
- Own a multi-repository, version-controlled documentation architecture (Antora + CI/CD) using Markdown/AsciiDoc, Git, Jira, and Confluence, managing content lifecycle across both legacy and current product suites and structuring content for human readers and AI consumers alike.
- Lead quarterly Move-to-Engineering (MTE) analysis with Support leads to surface knowledge-base gaps and apply structured content updates that deflect ticket escalations and continuously evolve content models.
- Own departmental budgets across tooling, subscriptions, data annotation, and training.

Technical Content & Support Team Lead

Jul 2023 – May 2025

Anyline GmbH — Vienna, Austria

- Autonomously scoped, architected, and authored two standalone documentation platforms from the ground up — TireBuddy (end-user app) and Anyline Insights — using Docusaurus, establishing information architecture, front-end structure, visual assets, content strategy, and accompanying tutorial videos.
- Architected and maintained the multi-repo Antora documentation set and a responsive docs site, authoring SDK/API integration guides across iOS, Android, React Native, and Cordova.
- Overhauled knowledge-base structure and workflow across Atlassian (Jira/Confluence), GitLab, and Salesforce, improving release consistency and documentation velocity.

Support Engineer (Level 2, progressive roles)

Sep 2022 – Jul 2023

Anyline GmbH — Vienna, Austria

- Hired into a hybrid creative-technical role to strengthen technical documentation and onboarding; produced knowledge-base articles, tutorial videos, and visual assets, and established scalable documentation practices.
- Resolved advanced cross-platform SDK integration issues for B2B developer customers; authored troubleshooting guides and internal playbooks.
- Identified recurring developer-friction points and shipped documentation improvements that reduced support load; collaborated with QA and Engineering to triage and diagnose issues.

Front-End Web Developer (Freelance)

Feb 2022 – Sep 2022

Freelance — Vienna, Austria

- Built and deployed a responsive e-commerce web application (WordPress, WooCommerce), implementing SSL/security standards, cross-browser compatibility, SEO (Yoast), and an efficient product/stock-update system.

Founder & Lead Sound Designer / Video Editor

Oct 2015 – Apr 2020

Rogers Sound — Dublin, Ireland

- Founded and ran an audio post-production and video-editing studio, leading sound and picture post for short films, features, documentaries, and commercials in roles spanning editor, mixer, producer, and screenwriter.

EDUCATION

- Higher Diploma in Science in Computing — Griffith College, Dublin (First Class Honours), 2020–2021
- Higher Diploma, Sound Engineering & Music Technology — Academy of Sound, Dublin (Distinction, Levels 1–4), 2016–2018
- BA, Film Studies with English & Philosophy — University of Galway (NUI Galway), 2010–2015
- Film Studies (Study Abroad) — UC Berkeley, California (GPA 3.67/4.0), 2014
